EDRS PRICE	Document Not Available from EDRS.
DESCRIPTORS	*College Faculty; *Data Analysis; *Databases; Higher Education; *National Surveys; Optical Data Disks; *Statistical Analysis
IDENTIFIERS	*National Study of Postsecondary Faculty

ABSTRACT

This CD-ROM (for both MS-DOS and Windows) contains data from the 1993 National Study of Postsecondary Faculty (NSOPF) and all other available National Center for Education Statistics data analysis systems (DAS). The DAS is a menu-driven system that allows the user to produce frequencies, cross tabulations, and correlation matrices without access to individual responses. The DAS does not contain all variables from the studies but does contain most of those of interest to analysts for descriptive purposes. (DB)
